VH834-70-GW

	VH834-70-GW		
RSK nummer			
Width		834 mm	
Depth(Horizont)	550 mm		
Height	150 mm		
Depth (Sink)	~140 mm		
Material	DuPont™ Corian® Glacier White		
Weight	~1,70g/cm ³		
Static load	150kg		
Hole for tap		1	
Hole for bott.valve		1	

Consoles included. The mixer and bottom valve shown in the pictures are only for this exposure. Holes for mixers are 34 mm and holes for bottom valve are 40 mm as is standard.

Care instructions for Noas Care Washbasin in Corian® Solid Surface

Daily cleaning

Corian® is not maintenance-free, but it only takes minimal care to look fresh. For daily cleaning, it is enough to wipe Corian® with a damp cloth and water. Most stains and grease are removed with water, dishwashing detergent and white scouring sponge. The entire surface should be thoroughly cleaned from time to time, so that the luster does not develop unevenly. Use a mild detergent e.g. Jif with grinding effect for Corian® with silk matte finish and washing-up liquid for high gloss surfaces. Clean the entire surface with a cloth with gentle circular motions. Rinse/wipe with a damp cloth and wipe dry with paper or a soft cloth.

Stain removal

Try the simple solutions first. If there are still stains, use a little scouring cream with a grinding effect. Rub lightly. Avoid coarse scouring pads during daily cleaning. Strong abrasives or the green side of the scouring sponge (type Scotch-Brite™) should only be used in very difficult stains. If strong detergents or scouring pads are used, the surface should be restored to its original gloss, using a mild abrasive cleaner. Clean with circular motions, so that the treated area gets the same luster as the rest of the disc. Rinse and wipe.

Graffiti, ink, ballpoint pen – no problem!

Wash off according to the instructions under Stain removal. Burn marks and other more difficult stains are removed with scouring agents and a fine sponge.

Material

Corian® Solid Surface

Corian® Solid Surface work everywhere — it is an ideal choice for architects and designers specializing in healthcare, food service, hospitality, office buildings and schools.

Healthcare design's first priority is to prevent infection. The surfaces you specify play a critical role in helping you create safer healthcare environments.

The nonporous nature Corian® solid surface material can help healthcare architects and designers create spaces that, with proper cleaning, fit the needs of their installations.

Corian® Solid Surface meets the high expectations of the most demanding healthcare environments.

With unlimited potential for surfaces in public spaces, operating room walls, scrub rooms, showers basins and baseboards.

Corian® Solid Surface is:

- **Easy to clean and maintain.** When properly cleaned, Corian® Solid Surface does not support the growth of mould and mildew.
- **LGA certified** (stability against bacteria and fungi according to European standard DIN EN ISO 846).
- **A nonporous** surface with a smooth, seamless appearance.
- **Extremely durable and long-lasting**, standing up to hard knocks in high-traffic environments that can easily damage other surfaces, such as drywall and laminate.
- **Easily renewed and repaired.**
- **GREENGUARD Certified®** as low VOC-emitting material.
- **Stain resistant**

Noas Sweden® is an Industrial Partner of the Corian® Quality Network giving end customers the assurance that products meets all the tough requirements set by DuPont, the producer of Corian® Solid Surface and the exclusive owner of Corian® registered trademark.

Noas Sweden® is also a member of the Corian® Design Collaborative program, including selected companies able to provide high quality finished products made with Corian® Solid Surface.

Products included in the Corian® Design Collaborative program are associated to the “designed with Corian® Solid Surface” logo.

All products are developed in close cooperation with healthcare professionals and suppliers.
